THREE WEBSITE PROJECTS

Project Screenshots and Explanations

Name: M.Dinesh Kumar

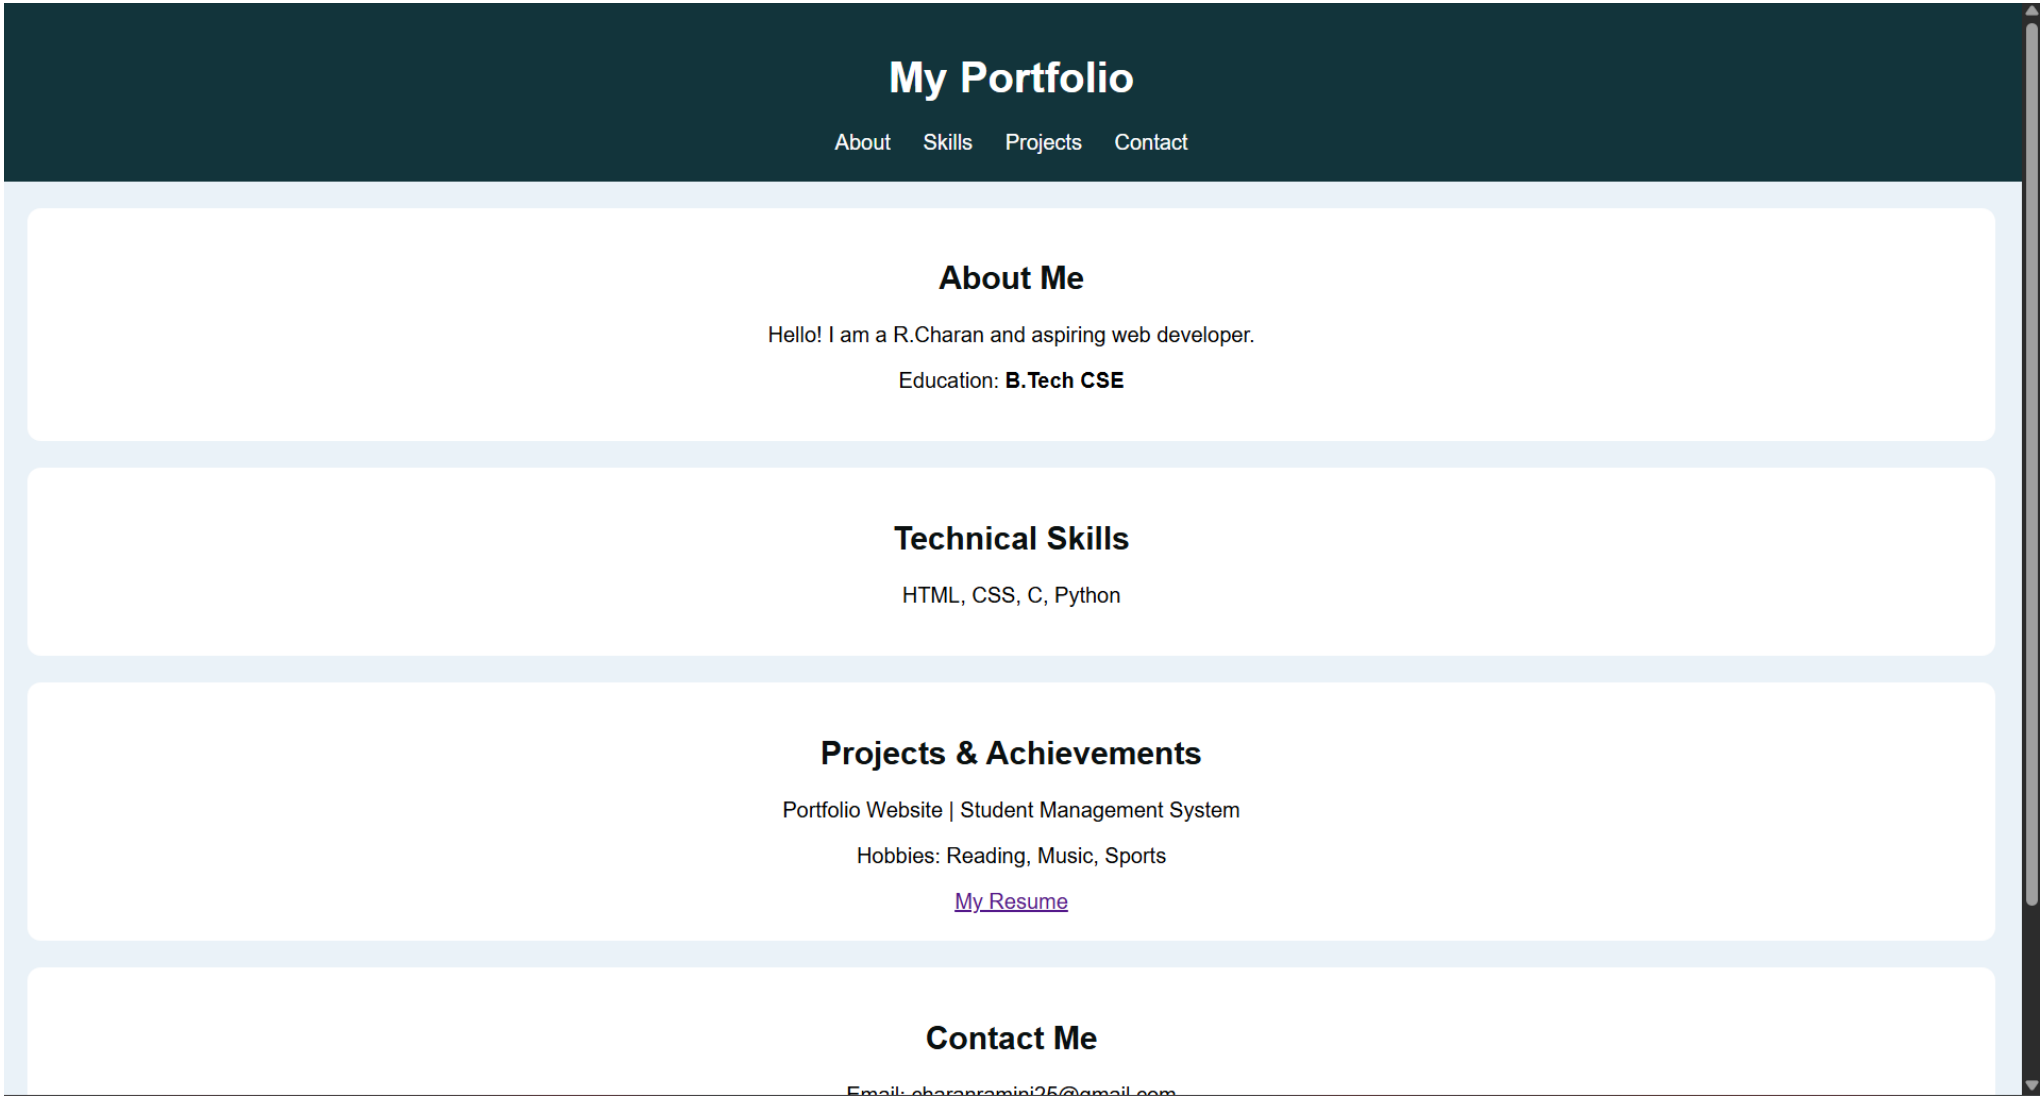

Section: CSE-2

Branch: Computer Science and Engineering

This document contains the screenshots and short explanations of three website projects.

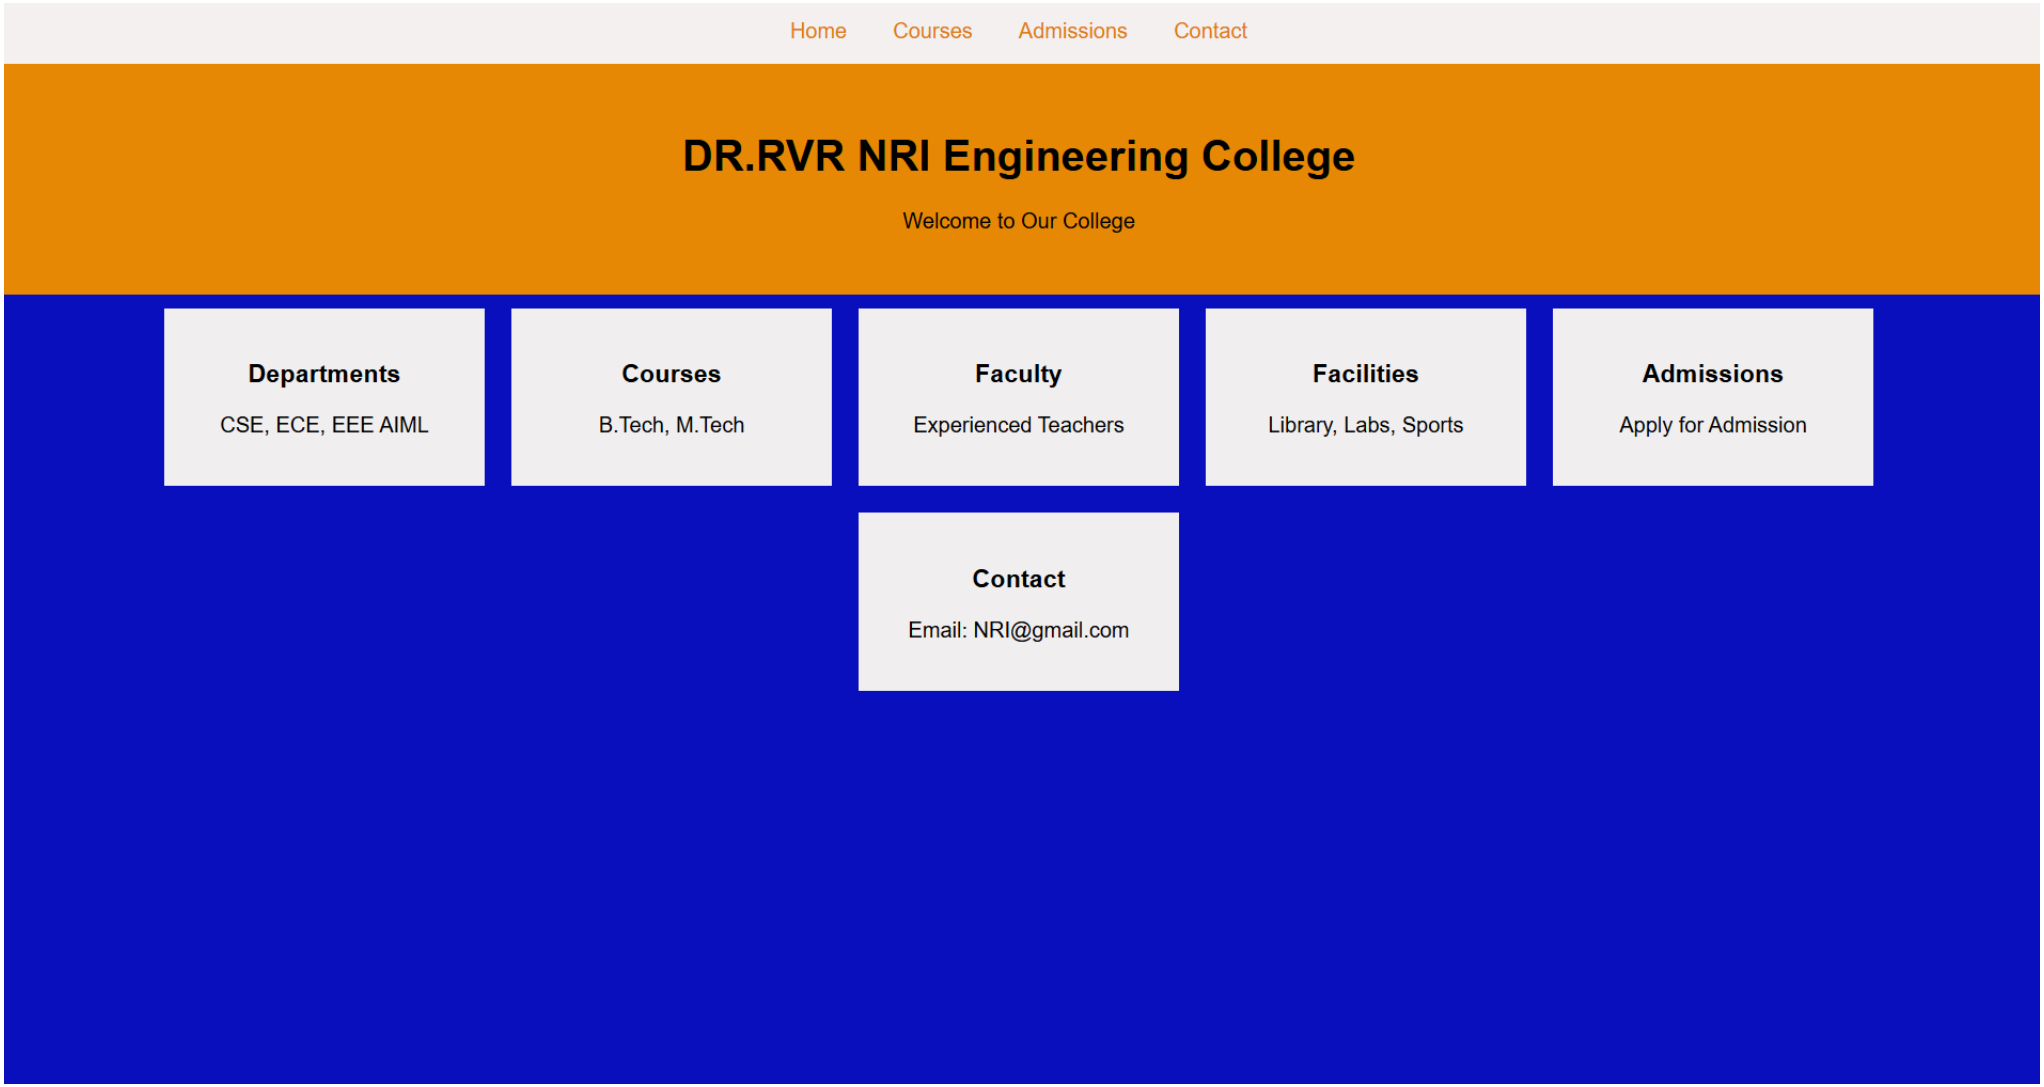

1. Personal Portfolio Website

This website presents the student's profile, education, technical skills, projects, hobbies, resume, and contact information. The top navigation links help visitors move between sections. The light background and separate content cards make the page simple and easy to read.

2. College Information and Admissions Website

This website provides key information about DR. RVR NRI Engineering College. The navigation menu includes Home, Courses, Admissions, and Contact. Information cards summarize departments, courses, faculty, facilities, admissions, and contact details, helping students quickly find important college information.

3. Movie Review and Rating Website

This website displays movie cards with posters, titles, genres, release information, cast details, and a View Reviews button. The card layout helps users browse several movies in one place. The design uses a contrasting header, dark background, and red buttons to make the movie section visually clear.
